# INTRODUCTION

Our Team been reviewing developments in Blockchain and DAG technology over time and has also studied about many cryptocurrency projects and identified a number of deficiencies related to them. We created a new innovative and cutting-edge platform that will make several improvements in Blockchain and DAG technology.

PyrexPlatform is a merging point of privacy, transparency and liquidity.

# PYREX PLATFORM

PyrexPlatform consists of Three separate but interchangeable blockchain standards which encompass all embodied objectives of Pyrex Ecosystem.

**PYX**

PyrexCoin - secured,  
untraceable, private,  
decentralized  
cryptocurrency.

**GPYX**

Golden Pyrex - Erc20  
utility token payment  
method for the  
available services on  
PyrexPlatform.

**PXB**

PyrexBank -security  
tokens DAG based  
Digital Banking platform.

# FEATURES AND SPECIFICATIONS

## PyrexCoin

Next Generation Cryptocurrency

Algorithm **Cryptonight v10**

Ticker: **PYX**

Total Supply: **18 446 744 PYX**

# FEATURES AND SPECIFICATIONS

## PYREXCOIN

### PRIVATE

PyrexCoin is created with a high level of privacy in mind, setting Ring Confidential Transactions (RingCT) with minimum ringsize (mixin) of 11 to conceal sources/amounts transferred and make it high resistance to blockchain analysis

### UNTRACEABLE

PyrexCoin is untraceable. Sending and receiving addresses are, encrypted transacted amounts are obfuscated by default. Transactions on the PyrexCoinblockchain cannot be linked to a particular user or real-world identity.

### DECENTRALIZED

PyrexCoin follows Satoshi Nakamoto's vision of decentralized, trustless cryptocurrency, i.e. a secure digital cash operated by a network of users. Transactions are confirmed by distributed consensus, and then recorded on the blockchain immutably. Third-parties do not need to be trusted to keep your PyrexCoin safe.

### FUNGIBLE

PyrexCoin is truly fungible, thanks to built-in privacy features. Just like cash, all PyrexCoin are equal, changeable. It is extremely unlikely that coin will ever be blacklisted by any party due to its association in previous transactions.

# MINING PYREXCOIN

PyrexCoin uses the miner friendly crypto algorithm Cryptonight V8.

Pool	Fee
youpool.io	0.4%
pyrex-pool.tokl.io	0.1%
pyrex.modpool.org	0.8%
crypto9coin.cf	0.5%
pyx.cryptohispano.net	1%
cnpool.cc	0.1%

or don't be shy and do it: <https://github.com/pyrex-coin/pyrex>

# FEATURES AND SPECIFICATIONS

## Golden PyrexCoin

Erc20 Standard token

Symbol: **GPYX**

Ticker: **GPYX**

Total Supply: **10 000 000 GPYX**

Contract: **0x24eeB54A34D24D4A4baa1B1379928f7978951AcA**

# FEATURES AND SPECIFICATIONS

## PYREXBANK TOKENS

Scalable DAG-based Security Token

Ticker: **PXB**

Total Supply: **100 000 000 000 PXB**

# GPYX TOKEN SALE

We decided to use the token sale model for our project, because our expected investors are our potential clients. They will be able to assess the project's profitability first. We know that by involving a wide range of investors we will be able to achieve much more impressive results, and will be able to implement all the planned functions in full to the required standard.

## **GPYX tokens may be used for the following purposes:**

- ▽ Paying Pyrexbank fees
- ▽ Paying Pyrex exchange fees at a discounted rate
- ▽ Paying Cloud mining contracts at a discounted rate
- ▽ Paying for marketplace products
- ▽ Creating liquidity through the decentralized exchange module
- ▽ For each 100 GPYX you will get 10 PYX as a bonus

In addition, token holders will take part in an airdrop of new tokens, which will subsequently be included in the exchange listing.

## **The discount on the exchange fees will be as follows:**

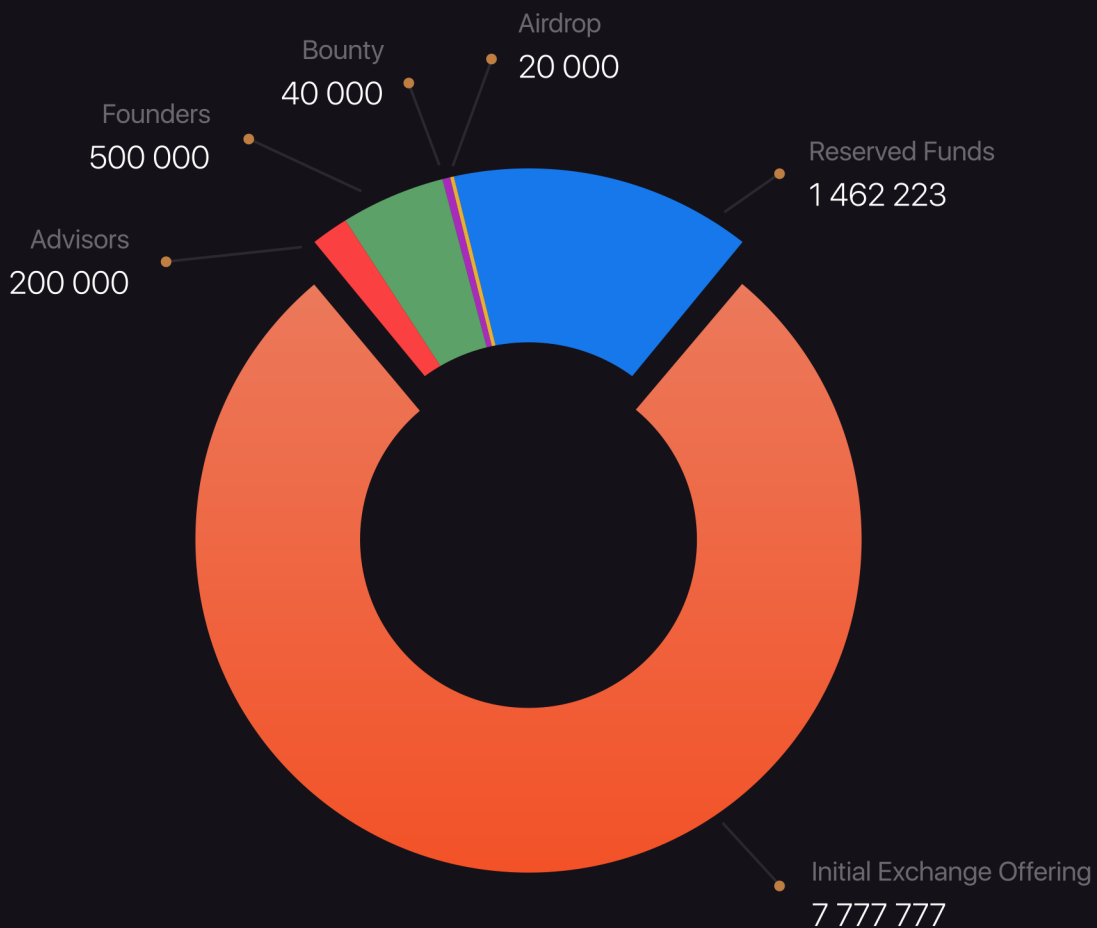

- ▽ 50% in the first year
- ▽ 25% in the second year
- ▽ 10% in the third year
- ▽ 5% in the fourth year
- ▽ After May 12, 2022, the discount will be fixed at 2%.

All unsold tokens will be burned.

# GPYX TOKEN SALE

Name of token:	GoldePyrexCoin
Symbol:	GPYX
Compatibility:	Ethereum (ERC-20)
Total number of tokens:	10 000 000
Tokens available for purchase:	7 777 777
Token sale value:	1 GPYX = \$2
Soft cap:	\$1 500 000
Hard cap:	\$15 555 554
Participation options:	ETH, BTC, XRP, LTC, DASH, XMR, NANO

## DISTRIBUTION OF TOKENS

# PYREXCLOUD

PyrexCloud is the multi-algorithm cloud mining service, offering an alternative to those who would like to engage in Bitcoin and Altcoin mining.

PyrexCloud mining platform offers you a smart and easy way to mine cryptocurrencies. Our platform is suitable for those who are new to the world of cryptocurrencies, as well as for cryptocurrency experts and large-scale miners. PyrexCloud

It's super simple - Your mining rigs and asics are already set up and running.

We provide the most efficient and reliable cloud mining services.

The benefits of mining with us: real company with real people working for it, cheap electricity and are cooled efficiently.
